1.1 rc_abg.tex

MTT command:

```
mtt rc abg tex
```

The acausal bond graph of system **rc** is displayed in Figure 1.1 (on page 10) and its label file is listed in Section 1.1.1 (on page 9). The subsystems are listed in Section 1.1.2 (on page 12).

The system **rc** is the simple electrical rc circuit shown in Figure 1.1 (on page 10). It can be regarded as a single-input single-output system with input e_1 and output e_2 .

1.1.1 Summary information

System rc:a simple rc circuit A basic linear voltage-in voltage-out RC circuit

Figure 2.1: System **rc2**: acausal bond graph

The acausal bond graph of system **rc2** is displayed in Figure 2.1 (on page 25) and its label file is listed in Section 2.1.1 (on page 26). The subsystems are listed in Section 2.1.2 (on page 27).

This simple example illustrates the use of *hierarchical* bond graphs in MTT.

There are 4 subsystems:

Se:u An effort source providing the system input u .

RC:rc_1 An instance of the **RC** subsystem. In the label file for **rc2**, the parameters r_1 and c_1 are assigned to this subsystem.

RC:rc_2 An instance of the **RC** subsystem. In the label file for **rc2**, the parameters r_2 and c_2 are assigned to this subsystem.

De:y An effort detector providing the system output y .
